PART 4 OF 4

COMPLIANCE TEST REPORT
LABORATORY REFERENCE NUMBER: 606
FD 021 (REV. 6-00)

HANDGUN MODEL INFORMATION

Handgun Type (check one): Revolver: ____ Pistol: ✓

Make: Jimenez Arms

Model: 122704

Caliber: 380 Barrel Length: 2 3/4

Construction Material(s) (i.e., stainless steel, alloy, etc.): Zinc Alloy

Serial Numbers: 06
09
010 *

NOTE: Place an asterisk (*) next to the serial number of the handgun that is being submitted to the California Department of Justice with this report. Attach additional sheets, if necessary.

AMMUNITION/PRIMED CASE INFORMATION

Ammunition Used: Manufacturer: Remington

Cartridge: 380 Automatic

Caliber: 380

Bullet Weight and Type (i.e., FMJ, JHP, etc.): 95 Gr. MC

Lot #: R27NB1

Primed Cases Used: Manufacturer: Remington

Primer: Remington.

MANUFACTURER/IMPORTER INFORMATION

Handguns Submitted by: Jimenez Arms

Address: 380 Clinton St, Costa Mesa CA 92626

Country: USA

TEST RESULTS

Safety Device:

All Handguns

Revolver: has a safety device that, either automatically in the case of a double-action firing mechanism or by manual operation in the case of a single-action firing mechanism, causes the hammer to retract to the point where the firing pin does not rest upon the primer of the cartridge: (Yes) _____ OR;

Pistol: has a positive manually operated safety device, as determined by standards relating to imported guns promulgated by the federal Bureau of Alcohol, Tobacco, and Firearms: (Yes) ✓

Firing Test:

Each of three handguns met both of the following requirements:

Fired the first 20 rounds without a malfunction that was not due to a faulty magazine or ammunition; and

Fired the full 600 rounds with no more than six malfunctions that were not due to a faulty magazine or ammunition and without any crack or breakage of an operating part of the handgun that increased the risk of injury to the user.

Drop Safety Test:

Each of three handguns did not fire a primer during any of the following drop tests:

Drop #1:	Normal firing position; barrel horizontal.
Drop #2:	Upside down; barrel horizontal.
Drop #3:	On grip; barrel vertical.
Drop #4:	On muzzle; barrel vertical.
Drop #5:	On either side; barrel horizontal.
Drop #6:	If there is an exposed hammer or striker, on the rearmost point of that device, otherwise on the rearmost point of the handgun.

NOTE: Attachment A must be executed and submitted with this Compliance Test Report.

I declare under penalty of perjury according to the laws of the State in which this report was executed that all statements made in this report and Attachment A are true and complete.

RE: California Handgun Testing Program

Dear Mr. Jimenez:

The Firearms Division has received the Compliance Test Reports and prototype handguns for each of the models indicated on the attached Roster Listing Fee Requests. Pursuant to section 968.90, Title 11, Division 1, Chapter 12.4, of the California Code of Regulations, the Division will not approve the DOJ-Certified Laboratory reports until the required listing fees are paid. Therefore, please submit to the Division a check made payable to the Department of Justice in the amount of $200 ($200 X 1 handgun model).

As you can see there is a certification at the bottom of each Roster Listing Fee Request. The Division wants to ensure that the Roster of Certified Handguns contains the correct information regarding your handguns. Please answer the questions for the model indicated on each request. The certification must be signed, completed by a representative of the company as indicated on the form, and returned to the Division with the above-referenced fees.

Once the appropriate fees and executed certifications have been received, the Division will make a determination regarding whether these handguns can be sold in California. If you have any questions, please call me at (916) 263-4868.

Sincerely,

LESA SAVILLE, Manager
Firearms Information Services Section

Re: **California Public Records Act Request**
Licencee - Paul Jimenez dba Jimenez Arms

California Department of Justice:

Please provide me with copies of the following documents regarding your licencee Paul Jimenez dba Jimenez Arms, 380 Clinton Street, Costa Mesa, California:

For the Jimenez Arms **Model JA-38** and any other models except the Model JA-9:

All documents related to the testing and/or certification of the Jimenez Arms firearm, including, but not limited to, all FD-021 forms, all FD-021 Ammunition Certifications, all affidavits, declarations and sworn statements submitted by or on behalf of the licencee, and all other correspondence, documents, forms, photographs, video and audio recordings, or other tangible materials arising from, related to, or otherwise concerning such matters.

This request is made pursuant to the California Public Records Act, Govt. Code Sections 6250, et seq., and on all other legal grounds. We agree to pay all fees for search, duplication and review, as necessary. We wish to have the records sent to us at the above-listed address, without our prior inspection at a DOJ office.

We would appreciate your **earliest possible response.** Please contact me directly by telephone should any questions or problems arise.

Thank you for your courtesy and cooperation.

Very truly yours,

Richard R. Ruggieri

Revolver: has a safety device that, either automatically in the case of a double-action firing mechanism or by manual operation in the case of a single-action firing mechanism, causes the hammer to retract to the point where the firing pin does not rest upon the primer of the cartridge:
(Yes) _____ OR;

Pistol: has a positive manually operated safety device, as determined by standards relating to imported guns promulgated by the federal Bureau of Alcohol, Tobacco, and Firearms:
(Yes) ✓

Firing Test:

Each of three handguns met both of the following requirements:

Fired the first 20 rounds without a malfunction that was not due to a faulty magazine or ammunition; and

Fired the full 600 rounds with no more than six malfunctions that were not due to a faulty magazine or ammunition and without any crack or breakage of an operating part of the handgun that increased the risk of injury to the user.

Drop Safety Test:

Each of three handguns did not fire a primer during any of the following drop tests:

Drop #1:	Normal firing position; barrel horizontal.
Drop #2:	Upside down; barrel horizontal.
Drop #3:	On grip; barrel vertical.
Drop #4:	On muzzle; barrel vertical.
Drop #5:	On either side; barrel horizontal.
Drop #6:	If there is an exposed hammer or striker, on the rearmost point of that device, otherwise on the rearmost point of the handgun.

NOTE: Attachment A must be executed and submitted with this Compliance Test Report.

I declare under penalty of perjury according to the laws of the State in which this report was executed that all statements made in this report and Attachment A are true and complete.

COMPLIANCE TEST REPORT

STANDARD AMMUNITION CERTIFICATION

I hereby certify that:

Standard ammunition, as defined in Regulation Section 968.20(r), Chapter 12.4, Division 1, Title 11 of the California Code of Regulations, was provided and used during the firing tests that were conducted for the following handgun model. If applicable, the standard ammunition was the more powerful cartridge that was recommended by the manufacturer/importer:

Handgun Type (check one): Revolver: ____ Pistol: ✓

Make: Jimenez Arms

Model: Prototype 1

Caliber: 9mm Barrel Length: 3.7"

Construction Material(s) (i.e., stainless steel, alloy, etc.): Zinc Alloy

Serial Numbers: 0002

0003

0004

This Certification is in addition to the Compliance Test Report that was submitted for the above-referenced handgun; Laboratory Reference Number: 605

This Certification is being executed and submitted by the:
Manufacturer/Importer ____ DOJ-Certified Laboratory ✓

I declare under penalty of perjury according to the laws of the State in which this report was executed that all statements made in this certification are true and complete.

RE: Jimenez Arms Model J.A. NINE Slide

Dear:

Lisa as per our conversation today on 10/27/04 I submit this response per your request.

The slide of the firearm that was submitted for the roster was manufactured in the same manure as the slide I submit to you now.

The only deference is the stampings, on the one submitted on 10/05/04 and this one I now submit to the department. At the time I was ready for testing the Jimenez Arms stamps were not made and in order to sample how the plating will stick to the surface after polishing it is important to stamp an object. So I used a stamp that was available to me and after they were plated I removed the objects by machining and a buffing wheel.

I assure you and all that the slide submitted on 10/05/04 and this slide I submit now are products of Jimenez Arms and were manufactured by Jimenez Arms.

I declare under penalty of perjury that the above information is true and correct.

Sincerely

Paul Jimenez

Firearms Division

Subject : Compliance Test Reports

Attached is the Test Report Summary and Recommendation for the following handgun that has been tested and reported to the Division. It is the:

Make	Type	Model	Caliber	Barrel Length
Jimenez Arms	Pistol	Prototype I	9 mm	3.7"

The handgun has been inspected and denied by Ignatius Chinn due to lack of identifying marks on the sample provided by the manufacturer. Staff expressed concern to the manufacturer, Paul Jimenez, that the tested slide had "Bryco" buffed out. Mr. Jimenez indicated that the tested slide was indeed a newly manufactured slide by his company and had been erroneously stamped with the name of the previous manufacturer. At our request Mr. Jimenez submitted a new slide stamped "Jimenez Arms" which he stated was manufactured in the "same manner" as the tested slide. SAS Chinn inspected the new slide and denied approval since it was not tested. In a conversation with Randy Rossi, Steve Buford, Lesa Saville, and Nathaniel Barrell on November 1, 2004 at approximately 2:45 PM , Director Rossi determined that this handgun should be approved.

RE: California Handgun Testing Program

Dear Mr. Jimenez:

The Firearms Division has received the Compliance Test Reports and prototype handguns for each of the models indicated on the attached Roster Listing Fee Requests. Pursuant to section 968.90, Title 11, Division 1, Chapter 12.4, of the California Code of Regulations, the Division will not approve the DOJ-Certified Laboratory reports until the required listing fees are paid. Therefore, please submit to the Division a check made payable to the Department of Justice in the amount of $200 ($200 X 1 handgun model).

As you can see there is a certification at the bottom of each Roster Listing Fee Request. The Division wants to ensure that the Roster of Certified Handguns contains the correct information regarding your handguns. Please answer the questions for the model indicated on each request. The certification must be signed, completed by a representative of the company as indicated on the form, and returned to the Division with the above-referenced fees.

Once the appropriate fees and executed certifications have been received, the Division will make a determination regarding whether these handguns can be sold in California. If you have any questions, please call me at (916) 263-4868.

Sincerely,

Nathaniel Bonell for

RE: Jimenez Arms Model J.A. NINE

Dear: Nate

As per our conversation today 11/01/04 I submit a black finished model J.A. NINE pistol for listing on the roster. This pistol is manufactured the same and is identical in dimensions, material, linkage and function as the one submitted on 10/05/04.

I am also including a check for the additional roster fee of $200.00.

If you could expedite the listing of this pistol it will be greatly appreciated.

I declare under penalty of perjury that the above information is true and correct.

RE: California Handgun Testing Program

Dear Mr. Jimenez:

The Firearms Division has received the Compliance Test Reports and prototype handguns for each of the models indicated on the attached Roster Listing Fee Requests. Pursuant to section 968.90, Title 11, Division 1, Chapter 12.4, of the California Code of Regulations, the Division will not approve the DOJ-Certified Laboratory reports until the required listing fees are paid. Therefore, please submit to the Division a check made payable to the Department of Justice in the amount of $200 ($200 X 1 handgun model).

As you can see there is a certification at the bottom of each Roster Listing Fee Request. The Division wants to ensure that the Roster of Certified Handguns contains the correct information regarding your handguns. Please answer the questions for the model indicated on each request. The certification must be signed, completed by a representative of the company as indicated on the form, and returned to the Division with the above-referenced fees.

Once the appropriate fees and executed certifications have been received, the Division will make a determination regarding whether these handguns can be sold in California. If you have any questions, please call me at (916) 263-4868.

Sincerely,

LESA SAVILLE, Manager

Re: **California Public Records Act Request**
Licencee - Paul Jimenez dba Jimenez Arms

California Department of Justice:

Please provide me with copies of the following documents regarding your licencee Paul Jimenez dba Jimenez Arms, 380 Clinton Street, Costa Mesa, California:

For the Jimenez Arms **Model JA-38** and any other models except the Model JA-9:

All documents related to the testing and/or certification of the Jimenez Arms firearm, including, but not limited to, all FD-021 forms, all FD-021 Ammunition Certifications, all affidavits, declarations and sworn statements submitted by or on behalf of the licencee, and all other correspondence, documents, forms, photographs, video and audio recordings, or other tangible materials arising from, related to, or otherwise concerning such matters.

This request is made pursuant to the California Public Records Act, Govt. Code Sections 6250, et seq., and on all other legal grounds. We agree to pay all fees for search, duplication and review, as necessary. We wish to have the records sent to us at the above-listed address, without our prior inspection at a DOJ office.

We would appreciate your **earliest possible response**. Please contact me directly by telephone should any questions or problems arise.

Thank you for your courtesy and cooperation.

Very truly yours,

Richard R. Ruggieri

WITNESSED BY: [signature] DATE: 10/5/04

HANDGUN MODEL INFORMATION

Handgun Type (check one): Revolver: ____ Pistol: ✓

Make: Jimenez Arms

Model: Prototype 1

Caliber: 9mm Barrel Length: 3.7"

Construction Material(s) (i.e., stainless steel, alloy, etc.): Zinc Alloy

Serial Numbers: 0002 * ✓
0003
0004

NOTE: Place an asterisk (*) next to the serial number of the handgun that is being submitted to the California Department of Justice with this report. Attach additional sheets, if necessary.

AMMUNITION/PRIMED CASE INFORMATION

Ammunition Used: Manufacturer: Federal

Cartridge: 9mm Luger

Caliber: 9mm

Bullet Weight and Type (i.e., FMJ, JHP, etc.): 115 Gr. FMJ

Lot #: 222H422

Primed Cases Used: Manufacturer: Federal

Primer: Federal

MANUFACTURER/IMPORTER INFORMATION

Handguns Submitted by: Jimenez Arms

Address: 380 Clinton Str
Costa Mesa CA 92626

Country: USA

TEST RESULTS

Safety Device:

All Handguns

Revolver: has a safety device that, either automatically in the case of a double-action firing mechanism or by manual operation in the case of a single-action firing mechanism, causes the hammer to retract to the point where the firing pin does not rest upon the primer of the cartridge:
(Yes) _____ OR;

Pistol: has a positive manually operated safety device, as determined by standards relating to imported guns promulgated by the federal Bureau of Alcohol, Tobacco, and Firearms:
(Yes) ✓

Firing Test:

Each of three handguns met both of the following requirements:

Fired the first 20 rounds without a malfunction that was not due to a faulty magazine or ammunition; and

Fired the full 600 rounds with no more than six malfunctions that were not due to a faulty magazine or ammunition and without any crack or breakage of an operating part of the handgun that increased the risk of injury to the user.

Drop Safety Test:

Each of three handguns did not fire a primer during any of the following drop tests:

Drop #1:	Normal firing position; barrel horizontal.
Drop #2:	Upside down; barrel horizontal.
Drop #3:	On grip; barrel vertical.
Drop #4:	On muzzle; barrel vertical.
Drop #5:	On either side; barrel horizontal.
Drop #6:	If there is an exposed hammer or striker, on the rearmost point of that device, otherwise on the rearmost point of the handgun.

NOTE: Attachment A must be executed and submitted with this Compliance Test Report.

I declare under penalty of perjury according to the laws of the State in which this report was executed that all statements made in this report and Attachment A are true and complete.

RE: Jimenez Arms Model J.A. NINE Slide

Dear:

Lisa as per our conversation today on 10/27/04 I submit this response per your request.

The slide of the firearm that was submitted for the roster was manufactured in the same manure as the slide I submit to you now.

The only deference is the stampings, on the one submitted on 10/05/04 and this one I now submit to the department. At the time I was ready for testing the Jimenez Arms stamps were not made and in order to sample how the plating will stick to the surface after polishing it is important to stamp an object. So I used a stamp that was available to me and after they were plated I removed the objects by machining and a buffing wheel.

I assure you and all that the slide submitted on 10/05/04 and this slide I submit now are products of Jimenez Arms and were manufactured by Jimenez Arms.

I declare under penalty of perjury that the above information is true and correct.

Sincerely

Paul Jimenez

From : Nathaniel Barrell, Analyst
Firearms Information Services Section
Firearms Division

Subject : Compliance Test Reports

Attached is the Test Report Summary and Recommendation for the following handgun that has been tested and reported to the Division. It is the:

Make	Type	Model	Caliber	Barrel Length
Jimenez Arms	Pistol	Prototype I	9 mm	3.7"

The handgun has been inspected and denied by Ignatius Chinn due to lack of identifying marks on the sample provided by the manufacturer. Staff expressed concern to the manufacturer, Paul Jimenez, that the tested slide had "Bryco" buffed out. Mr. Jimenez indicated that the tested slide was indeed a newly manufactured slide by his company and had been erroneously stamped with the name of the previous manufacturer. At our request Mr. Jimenez submitted a new slide stamped "Jimenez Arms" which he stated was manufactured in the "same manner" as the tested slide. SAS Chinn inspected the new slide and denied approval since it was not tested. In a conversation with Randy Rossi, Steve Buford, Lesa Saville, and Nathaniel Barrell on November 1, 2004 at approximately 2:45 PM , Director Rossi determined that this handgun should be approved.

RE: California Handgun Testing Program

Dear Mr. Jimenez:

The Firearms Division has received the Compliance Test Reports and prototype handguns for each of the models indicated on the attached Roster Listing Fee Requests. Pursuant to section 968.90, Title 11, Division 1, Chapter 12.4, of the California Code of Regulations, the Division will not approve the DOJ-Certified Laboratory reports until the required listing fees are paid. Therefore, please submit to the Division a check made payable to the Department of Justice in the amount of $200 ($200 X 1 handgun model).

As you can see there is a certification at the bottom of each Roster Listing Fee Request. The Division wants to ensure that the Roster of Certified Handguns contains the correct information regarding your handguns. Please answer the questions for the model indicated on each request. The certification must be signed, completed by a representative of the company as indicated on the form, and returned to the Division with the above-referenced fees.

Once the appropriate fees and executed certifications have been received, the Division will make a determination regarding whether these handguns can be sold in California. If you have any questions, please call me at (916) 263-4868.

Sincerely,

Nathaniel Bonell for

Dear:

Lisa as per our conversation today on 10/27/04 I submit this response per your request.

The slide of the firearm that was submitted for the roster was manufactured in the same manure as the slide I submit to you now.

The only deference is the stampings, on the one submitted on 10/05/04 and this one I now submit to the department. At the time I was ready for testing the Jimenez Arms stamps were not made and in order to sample how the plating will stick to the surface after polishing it is important to stamp an object. So I used a stamp that was available to me and after they were plated I removed the objects by machining and a buffing wheel.

I assure you and all that the slide submitted on 10/05/04 and this slide I submit now are products of Jimenez Arms and were manufactured by Jimenez Arms.

I declare under penalty of perjury that the above information is true and correct.

Sincerely

Paul Jimenez

RE: California Handgun Testing Program

Dear Mr. Jimenez:

The Firearms Division has approved listing on the Handgun Roster the handgun models indicated on the attached Handgun Roster Request Listing Without Testing forms. The listing fees have been received for these models.

As you can see there is a certification at the bottom of the form. The Division wants to ensure that the Roster of Certified Handguns contains the correct information regarding your handguns. Please answer the questions for the model indicated on each request. The certification must be signed, completed by a representative of the company as indicated on the form, and returned to the Division.

If you have any questions, please call me at (916) 263-4868.

Sincerely,

Nathaniel Barrell for

RE: Jimenez Arms Model J.A. NINE

Dear: Nate

As per our conversation today 11/01/04 I submit a black finished model J.A. NINE pistol for listing on the roster. This pistol is manufactured the same and is identical in dimensions, material, linkage and function as the one submitted on 10/05/04.

I am also including a check for the additional roster fee of $200.00.

If you could expedite the listing of this pistol it will be greatly appreciated.

I declare under penalty of perjury that the above information is true and correct.

Lesa:

Further to our recent communications about whether Jimenez Arms is shipping guns with approved safety devices, I just noticed that the Shining Star website (www.shiningstardist.com) now states at the very bottom that they are the "exclusive" distributors for Jimenez Arms. So it they are not sending safety devices to Shining Star, they aren't sending them to anyone.

Cheers,

Lesa:

That's certainly possible.

I guess the question is this - If Jimenez Arms shipped the guns to Shining Star in Texas with approved locks included, would Shining Star be free to ship the guns to a California retailer without the locks?

(Note that "included" means "accompanied by," because they definitely aren't including any approved locks INSIDE the box that contains the gun.)

If that would be legal, then there's no point my investigating further. If that would NOT be legal, I can have a CA dealer order some guns from Shining Star and see if any locks come with them. But who would have violated the existing law - Jimenez Arms (they shipped them with locks)? Shining Star (not subject to CA law)? The local dealer (has no way of knowing what was originally included or not)?

Mr. Ruggieri -

Since the handguns are not being shipped to California dealers the

distributer may be retaining any approved firearms safety devices included with the handguns by the manufacturer.

Lesa:

Thanks very much - I _thought_ that was the rule.

As far as I know, Jimenez Arms isn't selling direct to retail but is selling everything through Janice Jennings's company Shining Star in Texas.
Of
several Jimenez Model JA-9's ordered from Shining Star, none were shipped with any lock except the plastic clamshell.

Perhaps Jimnez Arms and Shining Star are getting around the rule by selling

the same cable locks back and forth, if only on paper, eg: JA "sells"
50
cable locks to SS with every 50 guns, but since SS doesn't ship them out with the guns (not being subject to the CA rule), they are surplus and SS "sells" them back to JA, with then "sells" them back to JA with the next 50 guns. This is just speculation of course, but it does suggest the need for some amendments of the rules.....

Mr. Ruggieri -

PC section 12088.1 requires that firearms manufactured in California include or be accompanied by an approved firearms safety device.
Division staff will investigate this matter regarding the Jimenez Arms handguns.

Lesa Saville, Manager
Firearms Information Services Section
Firearms Division
Department of Justice
(916) 263-4868

>>> "Richard R. Ruggieri" <rrrlaw@pacbell.net> 12/27/04 7:53 PM >>>
Randy/Lesa:

Is your office interpreting PC 12088.1 to require a manufacturer (eg: Jimenez Arms) to accompany its guns with an approved safety device?
Or
is there some exception I am missing?

Like Bryco before it, Jimemez Arms is equiping its guns only with the little black plastic clamshell trigger lock that it has made in China, and I don't see this on the approved list.

Thanks much.

Richard Ruggieri

PHOENIX ARMS

Phoenix Arms HP 22 5 inch barrel
(Dean Wilkerson Gunsmithing Laboratory Reference Number/Identifier 363, DOJ Report ID 215)

This test report was received on December 15, 2000. Nothing out of the ordinary was indicated on this report. This handgun was reviewed and approved for listing by the Handgun Review Committee on December 19, 2000.

Phoenix Arms HP 22 3 inch barrel
(Dean Wilkerson Gunsmithing Laboratory Reference Number/Identifier 380, DOJ Report ID 226)

The test report was received on December 21, 2000. The test report listed seven serial numbers for the tested firearms and ammunition from three different manufacturers. Dean Wilkerson was contacted by Lesa Saville on approximately that date regarding the abnormality. He indicated that four of the firearms exhibited allowable "malfunctions" per Penal Code Section 12127 (see attached).

This handgun was submitted to the Handgun Review Committee on January 4, 2001 for review. At that time Mr. Dean Wilkerson was contacted by Randy Rossi and the Committee via speaker phone call. Mr. Wilkerson explained the testing problems encountered. At that time Mr. Wilkerson disclosed the following information regarding the testing process for this handgun.

Testing of this firearm began on December 7, 2000 in the presence of the manufacturer. At that time the firearm (4215078) suffered three allowable malfunctions:

1 – Rounds 51 – 100 – Failure to eject
2 – Rounds 151 – 200 – Failure to eject
3 – Rounds 251 – 300 – Failure to extract

Testing of the firearm was terminated without firing the full 600 rounds

On December 8, 2000 testing was started on three additional HP 22 and suffered the following malfunctions:

4215073:

1 – Rounds 151 – 200 – Two failures to eject
2 – Rounds 251 – 300 – Two failures to eject
3 – Rounds 301- 350 – Failure to feed

4215074:

1 – Rounds 101 – 150 – Two failures to eject
2 – Rounds 251 – 300 – Failure to eject
3 – Rounds 301 – 350 – Failure to eject
4 – Rounds351 – 400 - Two failures to eject. At that time the test was called off because the laboratory felt there was an ammunition malfunction.

4215071:

1 – Rounds 51 – 100 – Failure to extract
2 – Rounds 101- 150 – Failure to eject
3 – Rounds 151 – 200 – Failure to eject
4 – Rounds 251 – 300 – Failure to feed. At that time the test was called off because the laboratory felt there was an ammunition malfunction.

The next round of testing took place on December 18, 2000 with ammunition from a different manufacturer:

4215061:

1 – Rounds 151 – 200 – Misfire
2 – Rounds 251 – 300 – Misfire

4215063:

1 – Rounds 21 – 50 – Failure to eject
2 – Rounds 151 –200 – Misfire
3 – Rounds 301 – 350 – Failure to feed
4 – Rounds 451 – 500 – Failure to feed

4215065:

1 – Rounds 251 – 300 – Misfire
2 – Rounds 501 – 550 – Failure to feed
3 – Rounds 501 – 550 – Failure to eject

During prior phone calls from Mr. Wilkerson he asked about a manufacturer's ability to submit a failed handgun to different laboratories for testing. He was not asked to disclose which manufacturer had a failed handgun. He also requested clarification on malfunction. During a subsequent phone call Mr. Wilkerson discussed a malfunction due to a round not properly feeding. Based on an explanation from the manufacturer Mr. Wilkerson accepted the malfunction as an allowable malfunction based on Penal Code Section 12127(b) and (c). This explanation was discussed with Tim Rieger and Ignatius Chinn and ruled as a plausible explanation for the malfunction.

Phoenix Arms
01/18/01

Penal Code Section 12127:

(a) As used in this chapter, the "firing requirement for handguns" means a test in which the manufacturer provides three handguns of the make and model for which certification is sought, these handguns not being in any way modified from those that would be sold if certification is granted, to an independent testing laboratory certified by the Attorney General pursuant to Section 12130. The laboratory shall fire 600 rounds from each gun, stopping after each series of 50 rounds has been fired for 5 to 10 minutes to allow the weapon to cool, stopping after each series of 100 rounds has been fired to tighten any loose screws and clean the gun in accordance with the manufacturer's instructions, and stopping as needed to refill the empty magazine or cylinder to capacity before continuing. The ammunition used shall be of the type recommended by the handgun manufacturer in the user manual, or if none is recommended, any standard ammunition of the correct caliber in new condition. A handgun shall pass this test if each of the three test guns meets both of the following: (1) Fires the first 20 rounds without a malfunction that is not due to faulty magazine or ammunition. (2) Fires the full 600 rounds with no more than six malfunctions that are not due to faulty magazine or ammunition and without any crack or breakage of an operating part of the handgun that increases the risk of injury to the user.

(b) If a pistol or revolver fails the requirements of either paragraph (1) or (2) of subdivision (a) due to either a faulty magazine or faulty ammunition, the pistol or revolver shall be retested from the beginning of the "firing requirement for handguns" test. A new model of the pistol or revolver that failed due to a faulty magazine or ammunition may be submitted for the test to replace the pistol or revolver that failed.

(c) As used in this section, "malfunction" means a failure to properly feed, fire, or eject a round, or failure of a pistol to accept or reject a manufacturer-approved magazine, or failure of a pistol's slide to remain open after a manufacturer-approved magazine has been expended.

Re: Phoenix Arms HP-22 3"
Reason For Testing 7 Handguns

As Per Handgun Testing Standards 5.2 Firing Test Requirement. If A Handgun Fails The Above-Referenced Firing Requirements Due To Either A Faulty Magazine Or Faulty Ammunition, The Handgun Shall Be Retested From The Beginning Of The "Firing Test Requirement." At That Time, A New Handgun Of The Same Model, May Be Submitted For The Test To Replace The Handgun That Failed.
The First 4 Handguns Ser#s 4215078, 4215071, 4215073, 4215074, Had Malfunctions Due To Faulty Ammunition. New Handguns Were Submitted For The Test.

Revolver: has a safety device that, either automatically in the case of a double-action firing mechanism or by manual operation in the case of a single-action firing mechanism, causes the hammer to retract to the point where the firing pin does not rest upon the primer of the cartridge:
(Yes) _____ OR;

Pistol: has a positive manually operated safety device, as determined by standards relating to imported guns promulgated by the federal Bureau of Alcohol, Tobacco, and Firearms:
(Yes) ✓

Firing Test:

Each of three handguns met both of the following requirements:

Fired the first 20 rounds without a malfunction that was not due to a faulty magazine or ammunition; and

Fired the full 600 rounds with no more than six malfunctions that were not due to a faulty magazine or ammunition and without any crack or breakage of an operating part of the handgun that increased the risk of injury to the user.

COMPLIANCE TEST REPORT
LABORATORY REFERENCE NUMBER: 363
ED 021 (REV. 6-00)

Drop Safety Test:

Each of three handguns did not fire a primer during any of the following drop tests:

Drop #1: Normal firing position; barrel horizontal.

Drop #2: Upside down; barrel horizontal.

Drop #3: On grip; barrel vertical.

Drop #4: On muzzle; barrel vertical.

Drop #5: On either side; barrel horizontal.

Drop #6: If there is an exposed hammer or striker, on the rearmost point of that device, otherwise on the rearmost point of the handgun.

STANDARD AMMUNITION CERTIFICATION

I hereby certify that:

Standard ammunition, as defined in Regulation Section 968.20(r), Chapter 12.4, Division 1, Title 11 of the California Code of Regulations, was provided and used during the firing tests that were conducted for the following handgun model. If applicable, the standard ammunition was the more powerful cartridge that was recommended by the manufacturer/importer:

Handgun Type (check one): Revolver: ____ Pistol: ✓

Make: Phoenix

Model: HP22

Caliber: 22 Long Rifle Barrel Length: 5"

Construction Material(s) (i.e., stainless steel, alloy, etc.): Alloy

Serial Numbers: 4215081
4215089
4215077

This Certification is in addition to the Compliance Test Report that was submitted for the above-referenced handgun; Laboratory Reference Number: 363

This Certification is being executed and submitted by the:
Manufacturer/Importer ____ DW DOJ-Certified Laboratory ✓ DW

I declare under penalty of perjury according to the laws of the State in which this report was executed that all statements made in this certification are true and complete.

Subject: Re: Jimenez Arms - Approved Safety Devices

Mr. Ruggieri -

Thank you for the additional information. As previously mentioned we will further investigate this matter to see if California law is being violated.

Lesa:

Further to our recent communications about whether Jimenez Arms is shipping guns with approved safety devices, I just noticed that the Shining Star website (www.shiningstardist.com) now states at the very bottom that they are the "exclusive" distributors for Jimenez Arms. So it they are not sending safety devices to Shining Star, they aren't sending them to anyone.

Cheers,

Mr. Ruggieri -

We have no control over what an out-of-state distributer is sending to an out-of-state dealer. We will further investigate this matter to see if California law is being violated.

Lesa:

That's certainly possible.

I guess the question is this - If Jimenez Arms shipped the guns to Shining Star in Texas with approved locks included, would Shining Star be free to ship the guns to a California retailer without the locks?

(Note that "included" means "accompanied by," because they definitely aren't including any approved locks INSIDE the box that contains the gun.)

If that would be legal, then there's no point my investigating further. If that would NOT be legal, I can have a CA dealer order some guns from Shining Star and see if any locks come with them. But who would have violated the existing law - Jimenez Arms (they shipped them with locks)? Shining Star (not subject to CA law)? The local dealer (has no way of knowing what was originally included or not)?

Mr. Ruggieri -

Since the handguns are not being shipped to California dealers the

distributer may be retaining any approved firearms safety devices included with the handguns by the manufacturer.

To licensed gun dealers who I have asked to order some Jimenez guns for inspection and testing purposes. One is in Colorado, the other in Oregon - five guns have been purchased so far - 2 black, and 3 nickel.

Thanks very much - I _thought_ that was the rule.

As far as I know, Jimenez Arms isn't selling direct to retail but is selling everything through Janice Jennings's company Shining Star in Texas.
Of
several Jimenez Model JA-9's ordered from Shining Star, none were shipped with any lock except the plastic clamshell.

Perhaps Jimnez Arms and Shining Star are getting around the rule by selling

the same cable locks back and forth, if only on paper, eg: JA "sells"
50
cable locks to SS with every 50 guns, but since SS doesn't ship them out with the guns (not being subject to the CA rule), they are surplus and SS "sells" them back to JA, with then "sells" them back to JA with the next 50 guns. This is just speculation of course, but it does suggest the need for some amendments of the rules.....

Subject: Re: Jimenez Arms Approved Locking Device?

Mr. Ruggieri -

PC section 12088.1 requires that firearms manufactured in California include or be accompanied by an approved firearms safety device.
Division staff will investigate this matter regarding the Jimenez Arms handguns.

Lesa Saville, Manager
Firearms Information Services Section
Firearms Division
Department of Justice
(916) 263-4868

>>> "Richard R. Ruggieri" <rrrlaw@pacbell.net> 12/27/04 7:53 PM >>>
Randy/Lesa:

Is your office interpreting PC 12088.1 to require a manufacturer (eg: Jimenez Arms) to accompany its guns with an approved safety device?
Or
is there some exception I am missing?

Like Bryco before it, Jimemez Arms is equiping its guns only with the little black plastic clamshell trigger lock that it has made in China, and I don't see this on the approved list.

Thanks much.

Richard Ruggieri
